Base Currency	US Dollar
Client Need	High Growth
Risk Profile	Conservative
Benchmark	EAA Fund Global Diversified Bond - USD Hedged
Investment Period	3 months or longer
Platform	Momentum or Allan Gray

Risk Profile

This is a high-income portfolio and is suitable for investors who prioritise the preservation of capital over market returns. Investors in this portfolio typically have an investment time horizon of at least one year. These investors are not willing to tolerate periods of high market volatility and are comfortable with returns that match, or slightly outpace inflation.

Investment Objective

The model portfolio is suitable for an investor with discretionary funds. The investment objective is to generate real returns in USD and is mainly focused on delivering short-term income. The preservation of capital is of primary importance. The portfolio will consist primarily of income orientated assets with minimal exposure to global equities. Investors in this portfolio have an investment horizon of 1 year or longer.

Annual Investment Management Fees - (Incl VAT)

Annual Report Net Expense Ratio	0,91
Discretionary Management Fee	0,35

Charges relating to the underlying portfolios are included in the TER and TIC, and these are payable within the underlying portfolios' NAV. **Underlying Funds TER:** The weighted-average of the **Total Expense Ratios (TER)** of the underlying portfolios. Each fund's TER represents the fund's charges, levies and fees. A higher fund's TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs. **Underlying Funds TIC:** The weighted average of the Total Investment Charge of the underlying portfolios. TIC represents the fund's TER plus brokerage, securities transfer taxes and STRATE levies.

Interactive Portfolios (Pty) Ltd is a licensed financial services provider. The information contained in this document has been recorded and arrived at by Interactive Portfolios (Pty) Ltd (FSP) Licence No. 44371, in good faith and from sources believed to be reliable, but no representation or warranty, expressed or implied, is made as to the accuracy, completeness or correctness. Past performance is not necessarily a guide to future performance. Performance figures are calculated using net returns (after-fee) of funds but are quoted gross of wrap fund fee. Changes in currency rates of exchange may cause the value of your investments to fluctuate. The value of investments and income from them may therefore go down as well as up, and are not guaranteed. The information is provided for information purposes only and should not be construed as the rendering of investment advice to clients. Interactive Portfolios (Pty) Ltd and its shareholders, subsidiaries, agents, officers and employees accordingly accept no liability whatsoever for any direct, indirect or consequential loss arising from the use or reliance, in any manner, on the information provided in this document. The weighted average cost of underlying funds Total Expense Ratio (TER) is calculated using the latest available TER of the underlying funds and their static weightings. This will vary as the actual weightings of the underlying funds fluctuate. The fluctuation of actual weightings of the underlying funds means the weighted average transaction costs (TC) will vary. The performance information is based on the back-tested performance of hypothetical investments over the time periods indicated. "Back-testing" is the process of objectively simulating historical investment returns by applying a set of rules for buying and selling securities, and other assets, backward in time, testing those rules, and hypothetically investing in the securities and other assets that are chosen. Back-testing is designed to allow investors to understand and evaluate certain strategies by seeing how they would have performed hypothetically during certain time periods. While back-testing results reflect rigorous application of the investment strategy selected, back-tested results have certain limitations and should not be considered indicative of future results. The results achieved in our simulations do not guarantee future investment results. For more information on the back testing methodology contact info@interactiveportfolios.co.za. Intermediary and LISP fees and/or stockbroker fees are client-dependent and therefore not reflected. The wrap fund (model portfolio) is made up of registered Collective Investment Schemes. Wrap fund fees are not included in the back-testing results. The Minimum Disclosure Document of the underlying funds can be obtained from the respective managers. **Interactive Portfolios (Pty) Ltd FSP 44371**
